## TIERRA ECO URNS

The Rio, Pura, Bola and Arena Urns are made of air-dried clay. Simply seal with water or glue to keep the ashes safe inside. They can be stored inside the home without degrading for years to come. Once buried, they take around four weeks to degrade, or 20 minutes to dissolve in water.

The Hielo and Fuego Urns are made of clay and then fired and glazed so will take approximately 10 years to biodegrade once buried. Glue provided to seal the lid.

## LIMBO ECO URNS

The Riviera Urn can be decorated with messages before it is committed to the sea. It floats for few minutes before sinking and completely dissolving. The Olea urn is perfect for ground burial, planting new tree life (depending on soil type) or nurturing an existing tree. The Samsara urn is also suitable for ground burial, fresh water and ocean dispersal, dissolving quickly. The Nu urns are made of pure salt and are designed for returning ashes to the ocean. All urns have water-soluble/biodegradable bags inside.

# SCULPTURAL BRONZE URNS

Cast in bronze, these stunning sculptural urns can be placed inside the home or outside in the garden. They are sealed with a threaded closure and are water tight. When left in nature, bronze will develop verdigris as it oxidizes over time. This can be delayed by applying a coat of natural beeswax occasionally, if desired.
